Driven by Innovation. Defined by Quality.

Since day one, PROPLAST has had a single, unwavering mission: to innovate. And that mission remains at the heart of everything we do.

We don't just manufacture products. We don't replicate what's already out there.

Instead, we focus on:

- Designing original, contemporary solutions tailored to the needs of modern professionals
- Maintaining uncompromising standards of quality in every product we create

Our commitment to excellence starts with the materials we use only premium grade raw materials that meet the most demanding international specifications.

But our vision doesn't stop at national borders.

We are expanding outward, strengthening our global presence through strategic exports and collaborations with respected manufacturing partners worldwide.

In our product catalog, you'll discover:

- A range of new, innovative products developed exclusively by PROPLAST
- Select offerings from the EPIQ Group, a collaboration we are proud to contribute to

PROPLAST – Shaping the future of foodservice, with innovation at its core.

proplast s.a.

roltex®

August Leerdh
ESTABLISHED 1921

HARFIELD

The EPIQ group was created through the collaboration of leading European manufacturers, with the shared goal of designing, developing, and producing innovative and high-quality products.

The full catalog of the group is available on our new website: www.proplast.gr

Our company has undertaken the exclusive representation of all the factories participating in the group for the Balkans and Cyprus.

Mobile Chef's station

PATENT

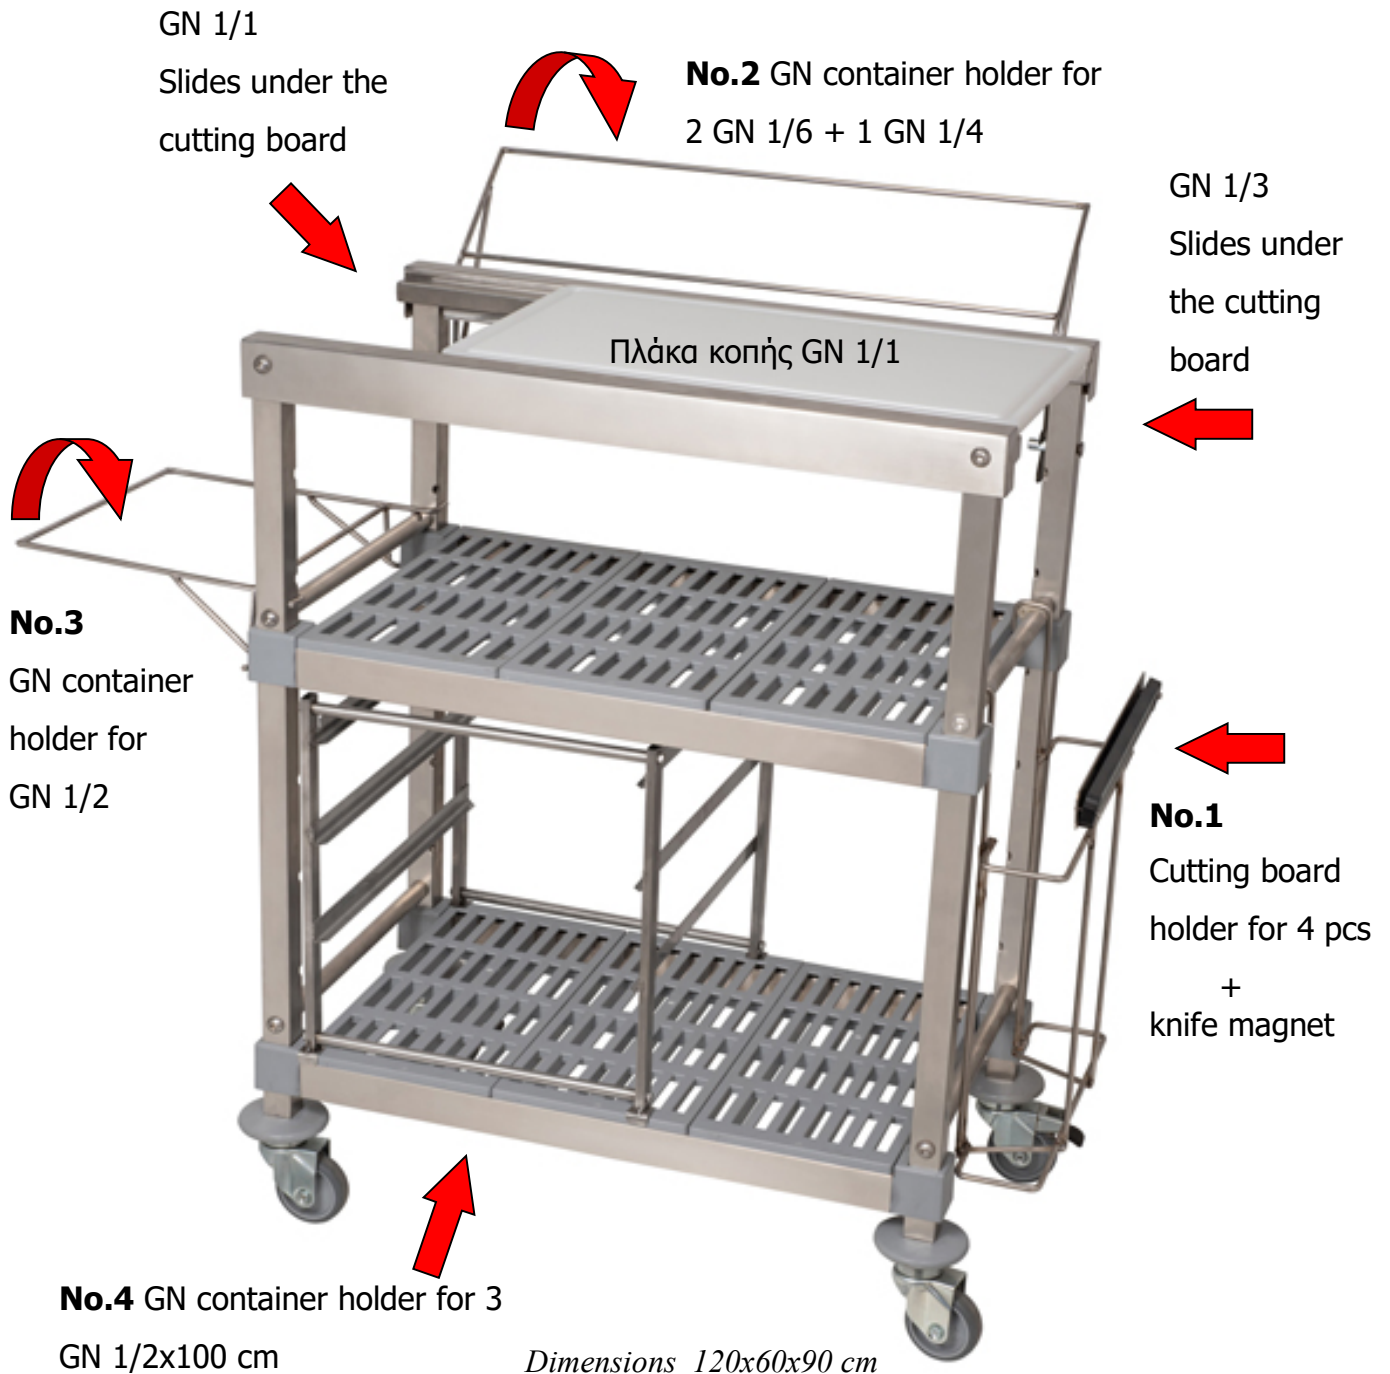

Designed to meet the needs of professional chefs and foodservice environments, the PROPLAST mobile chef's station is a multifunctional solution that elevates efficiency and organization in any kitchen.

Streamline your workflow by completing all preparation tasks in one convenient location and in less time. Equipped with a wide range of accessories—including GN container holders, a cutting board rack, magnetic knife strip, and more—this station is fully customizable to suit your specific needs.

Perfect not only for professional kitchens but also for passionate home cooks, it's the ideal partner for outdoor cooking, barbecues, and grilling setups.

Mobile Chef's station

🚫 TEXTURED SURFACES ON CUTTING BOARDS – NOT ALLOWED 🚫

Textured surfaces pose serious hygiene risks, as they trap food residues, leading to bacterial growth.

Therefore, the surface of a cutting board must be smooth, not textured, in order to allow proper washing and disinfection, in compliance with EFET (Hellenic Food Authority) and European hygiene regulations.

Additional Information

A textured surface does not provide anti-slip protection.

Anti-slip properties depend on the material itself, not on surface texture.

CUTTING BOARD MATERIALS

- Myth:

Wood is suitable for food contact.

- Truth:

According to international food safety regulations, all cutting surfaces must be made from food-grade plastic materials.

Approved materials for food contact include:

Polypropylene (PP), Polyethylene (PE), Polycarbonate (PC), ABS, and Polystyrene (PS).

Be cautious of unsupported claims, outdated opinions, and circulating myths.

Always consult professionals with extensive experience and knowledge in raw materials and manufacturing.

Myth

Wood is a safe and acceptable material for cutting boards.

Textured surfaces help prevent slipping.

Grooved or embossed cutting boards are easier to use and clean.

As long as a board looks clean, it's safe to use.

Any plastic board is food-safe.

Fact

Only **food-grade plastic materials** (e.g. PP, PE, PC, ABS, PS) are approved for contact with food.

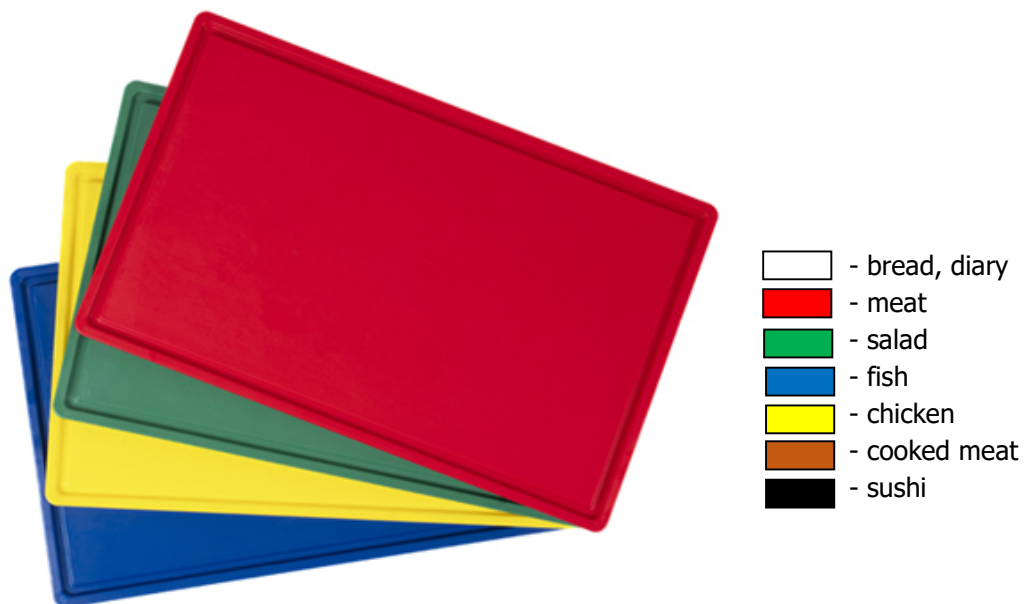

Anti-slip properties depend on the material, not the texture. Textured surfaces trap food residues.

Cutting boards must have a **smooth, non-porous surface** to allow proper cleaning and disinfection.

Invisible residues and bacteria can remain in textured or porous surfaces, violating hygiene rules.

Only certified, **food-contact approved plastics** meet hygiene and safety standards.

CUTTING BOARDS GN with canal

Differences between the **PROPLAST** cutting boards and the REST:

1. Material suitable for food contact.
2. Non-toxic colors that do not discolor, suitable for food contact.
3. Better finishing and rounded edges.
4. Injection machine production, material injected into mould with 160 tone pressure for a more solid cutting board.

ISOTHERMAL TRAY

This product is ideal for various sectors (colleges, hospitals, homes, catering establishment, etc). Made of polypropylene with special ANTIBACTERIAL treatment as it is a type of impact-resistant plastic, washed in industrial dishwashers and used for intensive daily use and high density polyurethane foam interior insulation.

The only tray that can be stacked in one piece with the other in any possible way.

Equipped with rings around plates and bowls to prevent odors and temperature loss when transported through the Center and with recesses for removing plates and/or bowls.

Composed of two equal parts, upper lid and lower base, which can be used interchangeably, facilitating their use and storage, thus reducing work times.

With accommodation for medication in the base part of the isothermal tray.

Dishes separated by cutlery area to facilitate their use and with the possibility of coupling any existing crockery in the Center.

PLASTIC & SHELVING INDUSTRY

MODULAR SHELVES

2025

**PATENT
20070200187**

Industrial area of Sindos 57022 - Thessaloniki GREECE

www.proplast.gr - info@proplast.gr - Tel : 0030-2310-799888

Unique and patented assembly system

With **PROPLAST** shelves you can achieve the optimal organization and storage in any section of HORECA, cold room and food processing industry.

Maximum hygiene and easy to clean.

Strong construction.

Corrosion resistant and long-lasting materials.

Easy assembly with a simple and smart system without screws and tools.

Easy to change and adjust the height of the shelves every 10cm at any time.

Potential to create corners and extensions.

The polypropylene plastic panels can be easily removed and washed in dishwasher.

The plastic panels are perforated for the better circulation of the (cooled) air between the panel and the stored product.

Length dimensions from 60cm to 170cm, extended every 10cm.

Height adjustable feet for perfect support in case of uneven ground.

Alternatively, addition of rubber wheels Φ 125mm with or without brakes.

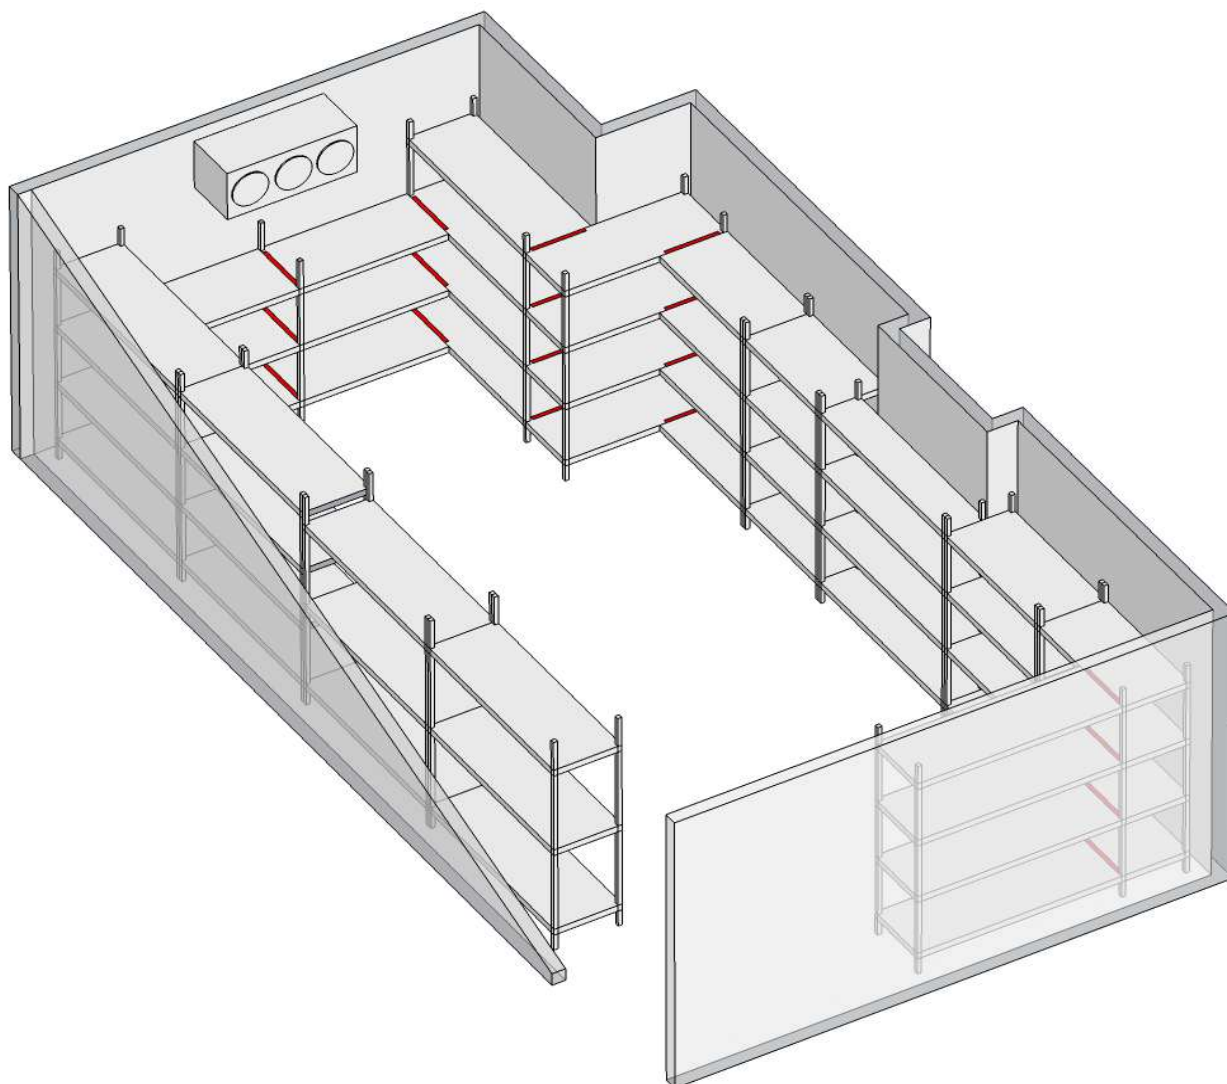

3 shelves types

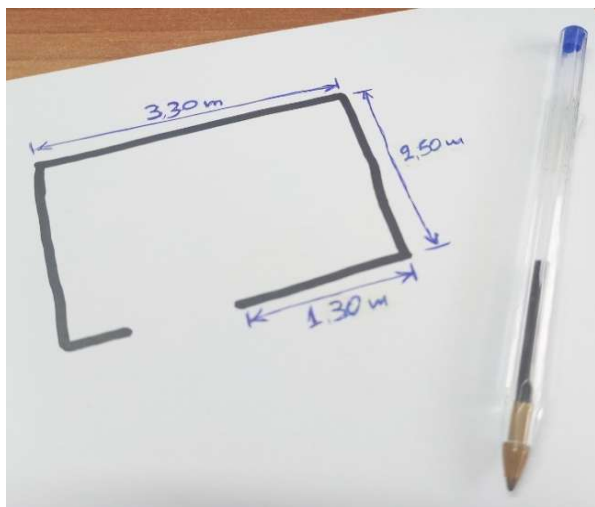

ALUPAST - ALUMINIUM frame with plastic panels

INOXPLAST - INOX frame with plastic panels

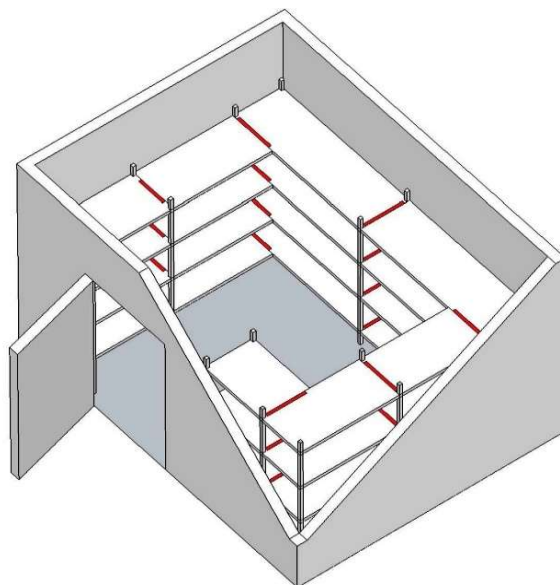

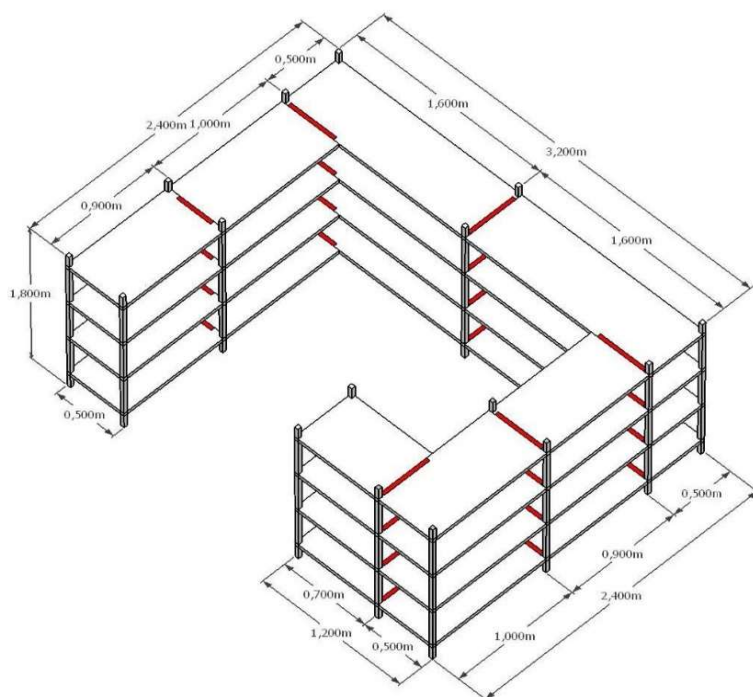

INOXBARS - INOX frame with INOX tubes

Take full advantage of your cold room or your storage space using our custom made shelves, specifically created depending on your needs, dimensions and space characteristics.

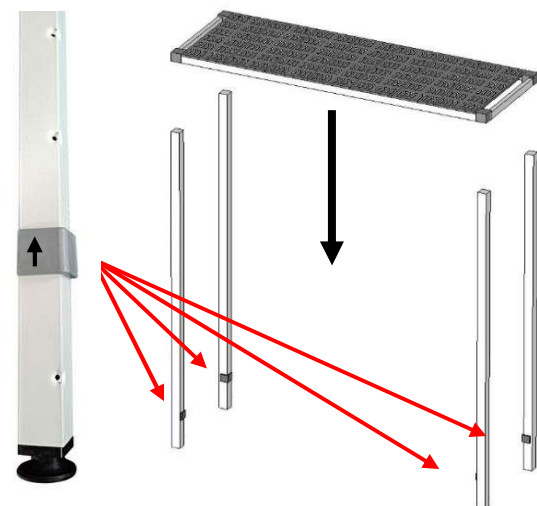

You can send us the dimensions of your cold room or your space. and we will prepare a 3D plan with a detailed offer.

SHELVES ASSEMBLY

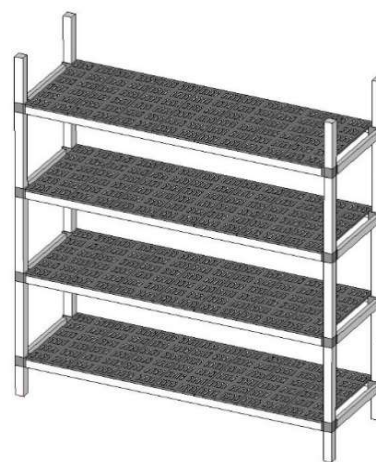

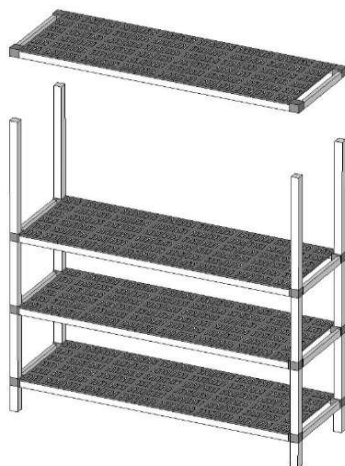

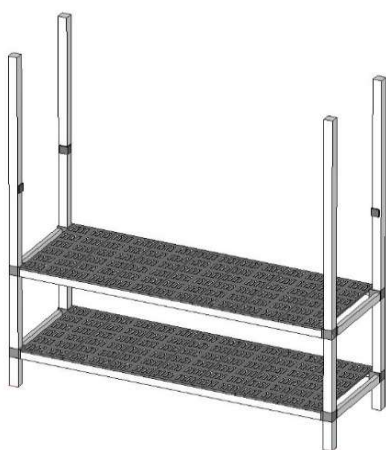

Place the wedges at the lowest point of the legs and pass the legs through the surface.

ATTENTION the wedge must enter inside the plastic joint as pictured

Place the wedges at the legs for the next shelf.

Repeat the same process depending on the number of surfaces you want to place.

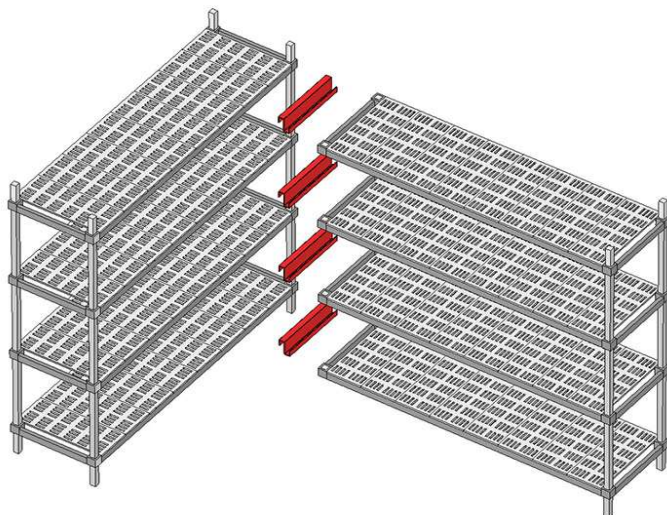

SHELVES ASSEMBLY

Assembly corner and extensions shelves

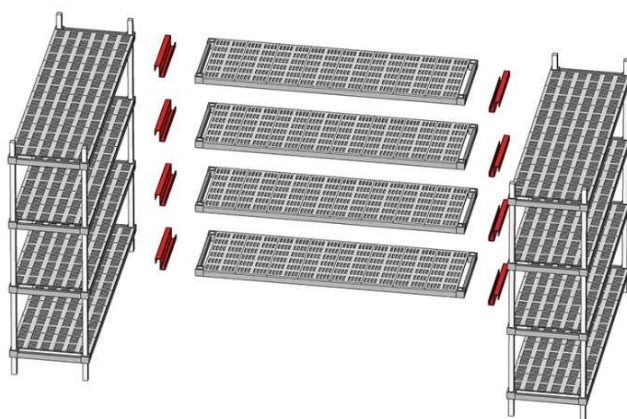

Corner shelves

Place the connector under the plastic grate of the 4-leg shelf and place the corner shelf on the connector.

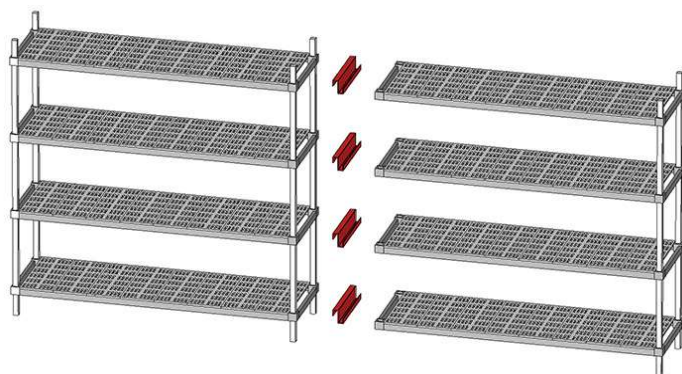

Π Shape

Place the connector under the plastic grate of the 4-leg shelf at the right and left side and place the corner shelf on the connector.

Extension shelves

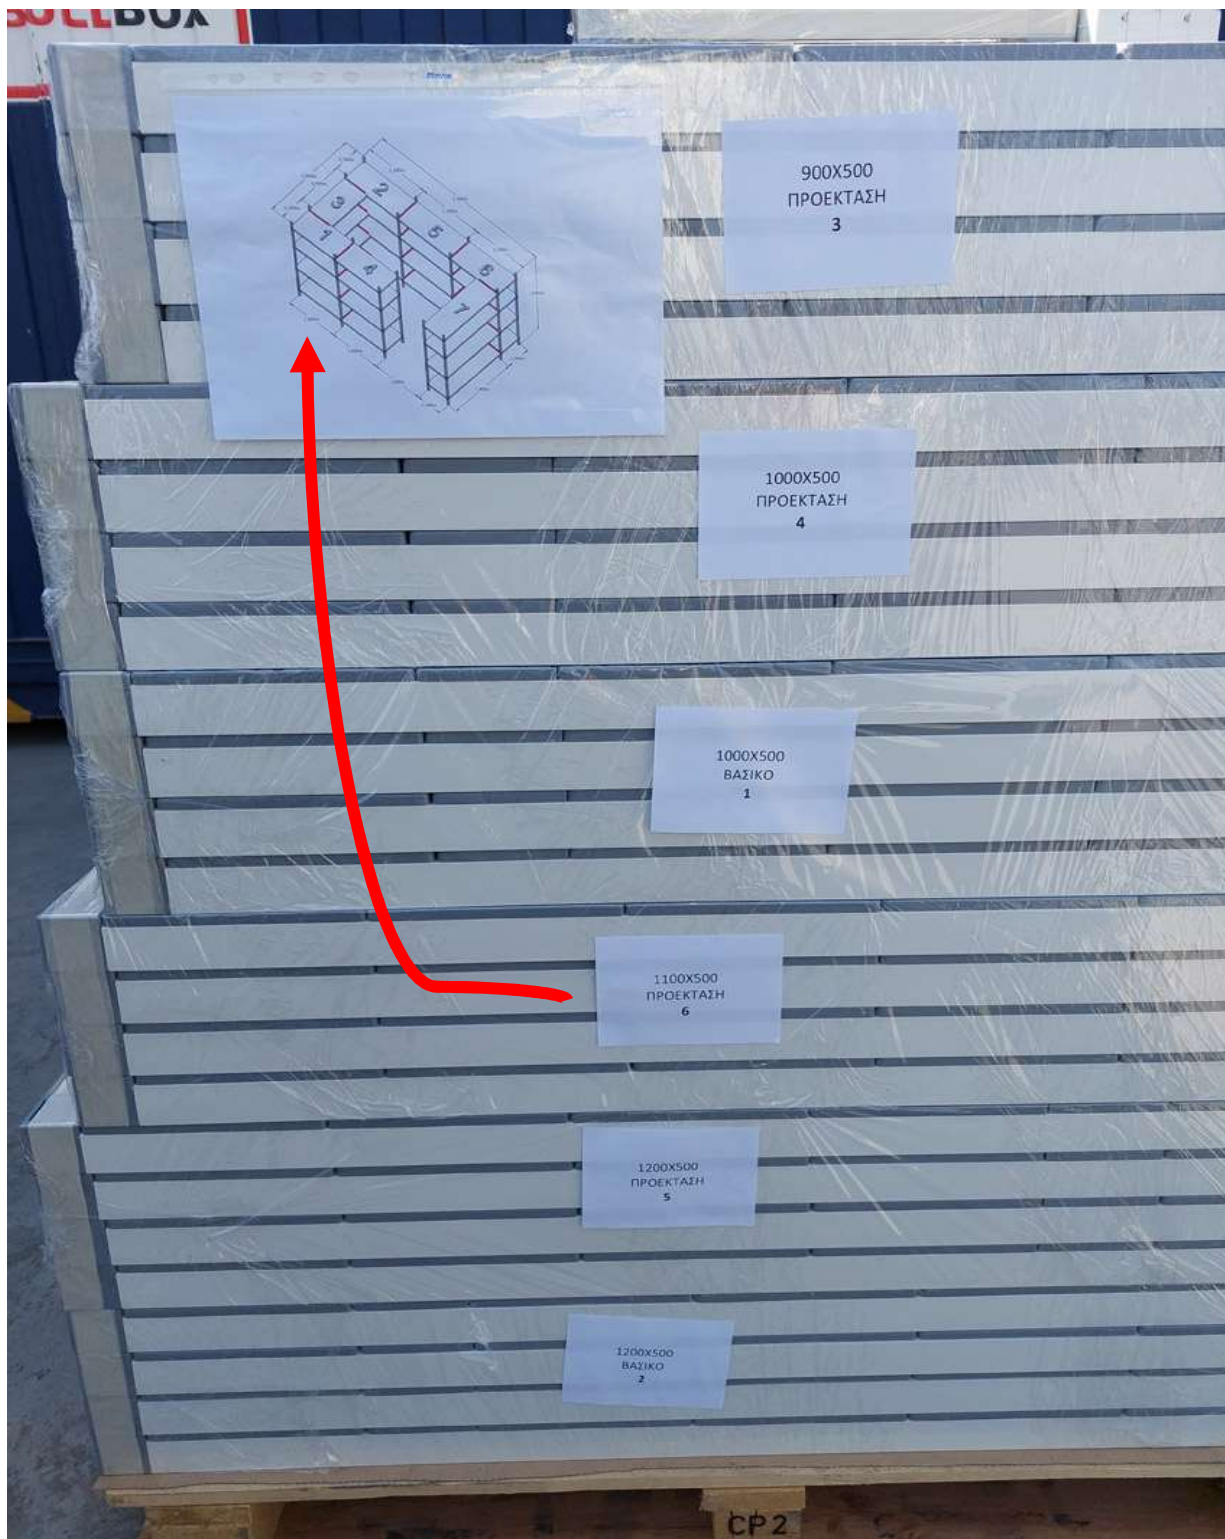

Place the connector at the side of the 4-leg shelf and place the extra shelf on the connector.

SHELVES PACKAGING

Compact packaging for a reduced transportation cost.

Every shelf is in a separated numbered parcel corresponding to the plan we send you therefore the assembly becomes quick and easy.

ALUPLAST

ALUMINIUM frame with PLASTIC perforated panels

ALUPLAST with electrostatic paint in white color

Electrostatic paint for extra protection of the aluminium and easier cleaning.

Shelf legs are tube 30 x 30 x 1,2 mm.

Shelf frames are tube 40 x 20 x 1,2 mm.

TOP RAIL SHELVING SYSTEM

The Top Rail Shelving System allows a better use of the space increasing the storage capacity compared to a standard shelving installation up to 80-90%.

We can use the **ALUPLAST** or **INOXPLAST** Shelves, depends on the customer's needs

It is fully customizable in length, width and height.

DUNNAGE RACK HEAVY DUTY

Stainless Steel frame and plastic panels.

Introducing Heavy Duty Dunnage Racks, the ultimate solution for keeping your products organized off the floor.

These racks are designed with a heavy-duty, all-welded stainless steel construction that will never rust or corrode, ensuring durability and longevity.

The framework features 50x50mm and 60x20mm providing a sturdy structure.

The legs of the rack are permanently sealed with welded stainless steels caps, adding extra stability and strength.

Perfect for walk-in coolers

DUN640	MAX LOAD : 800 kg
DUN1240	MAX LOAD : 700 kg

DUNNAGE RACK LIGHT HEIGHT

Aluminium frame with plastic panles

DUN600	MAX LOAD : 800 kg
DUN1200	MAX LOAD : 700 kg

CRATES RACKS

If you need to store numerous crates, our company offers you an additional solution for an adequate, safe and even better space saving storage.

Special racks of any dimensions and capacity you wish.

7-6040-20	Crates Rack 60x40 for 6 crates
7-6040-20T	Crates Rack 60x40 wheeled for 6 crates
7-6040-12	Crates Rack 60x40 for 10 crates
7-6040-12T	Crates Rack 60x40 wheeled for 10 crates
